DETAILED ACTION

1. This action is in response to the following communications: Amendment After
Final filed: 05/31/2011.

Allowable Subject Matter

2. Claims 1-3, 5-18 and 20-25 are allowed.

The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter:
Independent claims 1, 14 and 18, when considered as a whole, is allowable over the prior art of record. Specifically, the prior art of Gauvin teaches the limitation: "a display of connected computers, storage devices and a connection state in a graphic image represented in an area that can be overlapped by other areas". But the claims recite a different combination of limitation (specifically from claims 1 and 14): "illustrating at least two overlapping but separate hierarchies in the same mosaic-like graphic, each of said separate representing one or more of the relationships amongst the resources; (specifically claim 1) and arranging said resources representing same type of resources into columns, wherein adjacent columns group different resources, and a row intersecting adjacent columns indicates relationships between particular resources of the respective column wherein the mosaic-like graphic depicts a logical unit number (LUN) occupying a rank in both of the two overlapping but separate hierarchies", and (specifically from claim 14) "re-sizing, in response to said manipulating, a surface area

Art Unit: 2179

consumed on the GUI by said icons in proportion to a change upon respective ones of the resources caused by the manipulating the relationship, wherein the relationships of the resources are shown in a hierarchical tree from placement of icons in columns with resources of a same type being in a same column and a resource is shown as being a child to separate hierarchical trees that depict storage resources, and wherein the surface area of the icons are resized according to current allocation of storage resources; "(specifically from claim 18): preparing a graphic of at least two separate but overlapping hierarchies such that viewing the graphic in a first direction represents a first one of said separate but overlapping hierarchies in which ones of the first resource type report hierarchically to ones of the second resource type, and viewing the graphic in a second direction different from the first direction represents a second one of said separate but overlapping hierarchies in which ones of the first resource type report hierarchically to ones of the third resource type; and displaying the graphic, wherein the ,graphic is mosaic-like", that is not suggested or shown by Gauvin.

The prior art of Anslow teaches another combination, "a rendering of device representations of a plurality of devices in a network and of connections between devices", but does not suggest the limitations stated above from the immediate application.

The dependent claims further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable. Therefore the claims are allowed over the art because the claims differ in scope that is not seen or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
